# UNI CAMPA

**UniCampa is an Australian made range of campervans built on the LDV V80 chassis. UniCampa has been designed as a value for money cross over camping product.**

UniCampa is a fresh brand of RV's developed and designed with assistance from Sunliner Recreational Vehicles.

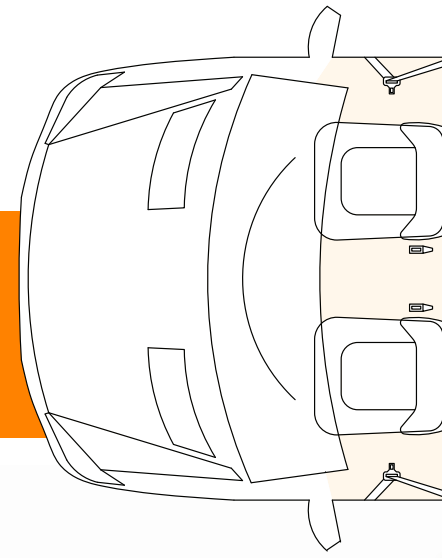

Using Sunliner's 40+ years experience in Australian RV manufacturing, UniCampa is able to offer customers the opportunity to enter into the RV market with an easy to use campervan ready to take off when you are.

## Campervan

At home in both urban environments and the open road the UniCampa is a multipurpose vehicle that combines comfort with versatility. A compact size that fits in a standard parking space and car-like driving performance, the UniCampa makes a useful 'daily drive' vehicle. When the weekend or holidays roll around it transforms into the perfect exploring partner.

The semi-bonneted chassis of the LDV V80 is the ideal base for the campervan. This design allows for a more comfortable driving position. Having more 'body of vehicle' between the road and the driver provides additional safety from wildlife that may cross your path. It also provides a walk-through, allowing easy access to the camper home.

The campervan can also be accessed via the rear barn doors and the passenger side sliding door. The drivers' side sliding door can also be opened to create extra airflow and ventilation.

## At home in urban environment

## Chassis

The LDV V80 is one of Europe's most respected vans. With an impressive number of worldwide sales and multiple awards, it's a van ready to make its mark in the Australian market. With an Italian VM Motor designed 2.5 litre turbo diesel engine, the Bosch fuel injection system and Euro designed automated manual transmission (AMT); the result is low fuel consumption.

The cabin of the UniCampa includes two bucket-style seats, air conditioning, cruise control, a radio with MP3 connectivity, power windows, rear-parking sensors and all the safety equipment you would expect in a modern vehicle.

The LDV chassis is supported by a nationwide network of service centres, a comprehensive 3-year/ 100,000kms warranty combined with a 3-year complementary roadside assist, providing peace of mind traveling.

**ments and on the open road.**
